PROFILE

Product-minded software engineer building across React/Next.js interfaces, Express APIs, relational and document data, caching, queues, authentication, validation, testing, security checks, CI/CD, health/readiness, and deployment. Focused on clear boundaries, predictable failure handling, and evidence-based delivery.

EDUCATION

Computer Engineering

Nisantasi University | Istanbul, Turkiye

CAPABILITIES

Frontend	TypeScript, React, Next.js, responsive UI, accessibility, PWA
Backend & APIs	Node.js, Express 5, REST, Zod, authentication, validation
Data & async	PostgreSQL, Prisma, MongoDB, Redis, BullMQ
Quality & delivery	Testing, security, GitHub Actions, CI/CD, health/readiness

SELECTED WORK

Eventify	Distributed event platform		
PostgreSQL/Prisma, Redis, BullMQ, authentication, bookings, waitlists, health/readiness, metrics, CI and security checks.			
Case study	Source	Live	
BookHaven	Full-stack commerce		
Next.js + Express + MongoDB with authentication, RBAC, catalog, cart, wishlist, reviews, checkout, orders, inventory and admin workflows.			
Case study	Source	Live	
FitFlow	Installable fitness PWA		
Personalized planning, guided intervals, progress tracking, local-first behavior, accessibility, responsive UX and offline readiness.			
Case study	Source	Live	
Venues API	Backend REST service		
Express 5 + TypeScript + Zod with layered architecture, strict validation, centralized errors, UUID resources, persistence and tests.			
Case study	Source	Live
