PROFILE

Product-minded software engineer building complete production software systems across TypeScript interfaces, backend APIs, relational and document data, caching, queues, authentication, validation, automated tests, runtime health, security checks, CI/CD, reliability, AI/LLM integrations, interactive systems, and deployment.

EDUCATION

Computer Engineering — Nişantaşı University Istanbul, Türkiye

TECHNICAL CAPABILITIES

Core: TypeScript · JavaScript · React · Next.js · Node.js · Express 5 · REST APIs · GraphQL · WebSockets · gRPC · OpenAPI · Zod
Data & async: PostgreSQL · Prisma · MongoDB · Mongoose · Redis · BullMQ
Quality & delivery: Jest · Supertest · Docker · GitHub Actions · CI/CD · Security · Observability · Accessibility · PWA · AI/LLM/MCP · FastAPI · Flutter

SELECTED ENGINEERING WORK

DISTRIBUTED EVENT PLATFORM

Eventify

Express/TypeScript system with PostgreSQL/Prisma, Redis, BullMQ, durable outbox workflows, authentication, bookings/waitlists, metrics, health/readiness checks, and security-focused CI.

FULL-STACK COMMERCE

BookHaven

Next.js + Express + MongoDB commerce system with HttpOnly sessions, RBAC, concurrency-safe cart/checkout flows, adaptive transactions, inventory safeguards, admin operations, validation, and CI-backed supply-chain hardening.

INSTALLABLE FITNESS PWA

FitFlow

Responsive training product with personalized plans, guided intervals, weekly progress, device-local persistence, accessibility, installability, and offline-ready behavior.

BACKEND REST SERVICE

Venues API

Express 5 + TypeScript + Zod API with routes → controllers → services, strict validation, centralized errors, UUID resources, persistence, and HTTP contract tests.
